

How your commissions were earned

Blair · Aug 1 – Sep 6, 2026

This is a breakdown of every commission you earned in this period, showing how each customer actually reached the site. It is built directly from the store's order and tracking records.

1,403 orders · \$40,555.56 earned

\$21,950.77 of that — 54% of everything you earned — came from customers *you* brought to True Sciences, coming back to buy again without clicking your link. You introduced them to us, and you keep earning every time they return.

The customers behind your repeat commissions

\$24,599.83 of your commission came from orders where the customer did not arrive on your link — they came back on their own, through search, or through one of our emails. This is who originally brought each of those customers to True Sciences.

Who first brought the customer in	Orders	Your commission	Share
Blair brought this customer to True Sciences	773	\$21,950.77	89.2%
They found True Sciences on their own	55	\$1,593.37	6.5%
Another affiliate brought them	32	\$1,003.19	4.1%
Not recorded	2	\$52.50	0.2%
Orders without a click on your link	862	\$24,599.83	100.0%

773 of those orders (\$21,950.77, 89%) were your own customers. Bringing someone to True Sciences once keeps paying you long after that first order.

How the customer reached the site

How they arrived	Orders	Your commission	Share
Typed the site in / came back directly	687	\$20,000.37	49.3%
Started on Blair's own link	541	\$15,955.73	39.3%
Found the site through search	119	\$3,144.57	7.8%
Clicked a True Sciences marketing email	40	\$803.28	2.0%
Came from another website	10	\$450.64	1.1%
Started on a different affiliate's link	3	\$139.49	0.3%
Came from a True Sciences ad	2	\$41.53	0.1%
Came from an email app (Gmail)	1	\$19.95	0.0%
All orders	1403	\$40,555.56	100.0%

Your link kept earning after the click

A click on your link is remembered for 30 days, and customers who are permanently linked to you count for longer than that. This is the gap between the click that earned each commission and the order itself.

When the order came in	Orders	Your commission
Same day as the click	489	\$15,355.44
1–7 days after the click	215	\$7,145.45

When the order came in	Orders	Your commission
8–30 days after the click	367	\$11,485.71
More than 30 days after the click	14	\$457.66
No click on file — earned on the lifetime link	318	\$6,111.30
All orders	1403	\$40,555.56

914 of your 1,403 orders (\$25,200.12) came in after the day of the click. Without that window, those orders would not have paid you.

Orders our email marketing brought back to you

When we email our customers and one of them comes back and buys, you get paid if your cookie or lifetime link is already on file. Across 11 different emails this period, that happened **111 times and earned you \$2,886.86** — and 70 of those were customers buying from us again.

What brought them back	Orders	Your commission
Newsletters and announcements we sent out	70	\$1,754.02
Automatic reminder emails (welcome, cart and browse reminders)	41	\$1,132.84
All emails	111	\$2,886.86

None of these orders came from someone clicking your link — we have left those out entirely, so nothing here is counted as our doing when it was really yours.

Repeat customers

443 of your 1,403 orders came from someone who had bought from True Sciences before.

Customer type	Orders	Your commission
Ordering for the first time	960	\$30,107.97
Bought from us before	443	\$10,447.59
All orders	1403	\$40,555.56

How this was put together

Figures cover orders placed between Aug 1 – Sep 6, 2026, counting completed and processing orders only. Commission totals include amounts already paid out as well as amounts still pending. "How the customer reached the site" uses the first page of the visit the order came from. Email-driven orders are counted using our email platform's own attribution, which credits a campaign or flow when the customer engaged with that email shortly before ordering — this is why more orders appear in the email section than in the arrival table above, where only visits that physically began on an email link are counted. Every line traces back to a specific order number and can be checked against the store records.
