

Email marketing orders & affiliate commissions

Blair, Trin & Emmie · Aug 1 – Sep 4, 2026

Klaviyo-attributed orders are identified from WooCommerce session data: a Klaviyo click (`_kx` tracking parameter in the session entry URL) or an email-client referrer (Gmail). These customers arrived from a marketing email — not from an affiliate link on that visit.

78 Klaviyo-attributed orders since Aug 1 (excludes orders paid to other affiliates).
78 paid Blair, Trin, or Emmie · 0 paid no affiliate commission.

78 orders · \$2,320.70 paid Blair, Trin, or Emmie even though the customer did *not* click their affiliate link on that visit — an older referral cookie overrode the email click.

How this works

Step	What happened	Result
1	Customer clicks a Klaviyo marketing email link	Session starts from email URL (<code>_kx</code> parameter)
2	Customer still has an older Blair / Trin / Emmie cookie in the browser	30-day referral cookie from a prior link click
3	Customer places an order from the email session	Stale affiliate cookie beats the email visit
4	Commission on this order	Blair / Trin / Emmie earns their sale rate — email drove the order but got no credit

Blair / Trin / Emmie commissions on email orders

Affiliate	Email orders with commission	Commission earned	Without their link on this visit
Blair	37	\$767.01	37 · \$767.01
Trin	27	\$1,130.71	27 · \$1,130.71
Emmie	14	\$422.98	14 · \$422.98
Total	78	\$2,320.70	78 · \$2,320.70

"Without their link on this visit" = session entry URL is from Klaviyo/email, not an affiliate link for that affiliate. Every B/T/E commission on email orders in this period matched that pattern.

All Klaviyo-attributed orders

Order	Date (PT)	Email signal	Commission to	Amount	Notes
#8023	Aug 6, 11:09 AM PT	Email referrer	Blair	\$48.59	Stale cookie
